## Description

This Luceplan Berenice Tavolo is a table lamp, which is mounted with the fixing pin space-saving directly in the tabletop. There are also available table lamps with base from this series.

The arms can be tilted as desired and adjusted, while the light is primarily emitted directly. There are offered glass reflectors in satin white, yellow, sage green and rose as well as metal reflectors in aluminum, brass and black. Through the glass reflectors the light is also emitted indirectly into the room. On the light head, an on / off switch is integrated. The light can be used with halogen lamps or LEDs. This lamp was designed in 1985 by Alberto Meda & Paolo Rizzatto.
