### Description

The Anthology Cellula LED is the original and no copy. The classic with a high degree of recognition is equipped with LEDs for this pendant light. A halogen version is also available. The biggest difference between LED and halogen is that, in the LED version, the lamps are placed in a slot on the bottom of the lamp body and not amongst the crystal prisms in holders. On thin cables, crystal prisms are suspended in neutral clear. The lamp is offered on request also with crystal prisms in coloured.

The LED lamp is dimmable with an already integrated Casambi module.
