### Description

The Stilnovo Quad P9 is a module that repeats itself, like the letters of an alphabet. A plastic structure, fruit of the inventiveness of the brothers Pio and Tito Toso, nine square pendant shapes fit together like die-cast aluminium links. LED sources emit indirect light that illuminates the ceiling and spreads into the surrounding space. The linear branched design makes it suitable for installation with large underlying tops, such as rectangular tables or reception counters. With an optionally available Casambi module, this pendant lamp can also be dimmed via Smartphone App.
