## Theia P

### Oberfläche

- black
- white

### Technical details

<b>Country of Manufacture</b>	 Spain
<b>Manufacturer</b>	Marset
<b>Designer</b>	Mathias Hahn
<b>Year of design</b>	2016
<b>protection</b>	IP20
<b>Scope of delivery</b>	LED
<b>voltage suitability</b>	230 - 240 Volt
<b>material</b>	aluminum, metal, methacrylate
<b>cable color</b>	black
<b>cable length</b>	200 cm
<b>dimming</b>	Push button dimmer on lamp head
<b>Wattage</b>	11.3 W
<b>LED</b>	inclusive
<b>Colour Rendering Index</b>	90
<b>Luminous flux in lm</b>	1,019
<b>Color temperature in Kelvin</b>	2,700 extra warm white
<b>Shade diameter</b>	32 cm
<b>lamp stand dimensions</b>	30 cm
<b>Dimensions</b>	H 116 cm

### Description

The Marset Theia P floor lamp has a rotating lamp shade. This shade consists of two hemispheres, one vertical and one horizontal, which partly overlap each other. The vertically fixed hemisphere is white on the inside, and white or black on the outside. In the corresponding surface are also the light rod and the light base. This hemisphere is made of painted metal. The horizontal hemisphere is made of thermoformed smoked glass methacrylate. The complete shade can be rotated around its own axis via a handle on the light rod. The light is emitted by an LED in a hemispherical element in the centre of the shade onto the white inside of the vertical hemisphere and reflected from there. The lamp shade can be aligned so that the floor lamp can be used as a reading lamp or to create indirect lighting on the wall or an object. The Theia P can be switched and dimmed by pressing a push button dimmer on the lamp head.
