### Description

The Serien Lighting Reflex2 Ceiling M450 distributes its light onto a prismatic reflector surface inside the lamp. From this, the light is reflected into the room and emitted absolutely glare-free. The reflector is available in matt white, gold, silver or white. Depending on the reflector colour, the lamp produces a different lighting effect.

A powerful LED with a colour temperature of 2700 Kelvin extra warm white is included as illuminant. On request, the Reflex2 Ceiling M450 ceiling lamp is also available with 3,000 Kelvin warm white or with Tunable White technology. The lamp with Tunable White technology can change the light from incandescent warm to cool white. On request, the ceiling light is also available DALI, 0-10 volt dimmable or with Casambi module.
