#### Description

The Serien Lighting Reflex2 Ceiling M600 emits its light onto a prismatic reflector surface, which is located inside the ceiling lamp. From there, the light is reflected into the room and emitted absolutely glare-free. The reflector is available in matt white, gold, silver or white. The selected reflector colour creates a different lighting mood.

The Reflex2 Ceiling M600 ceiling lamp is operated with a powerful LED that has a colour temperature of 2700 Kelvin extra warm white. On request, the lamp is also available with 3,000 Kelvin warm white or with Tunable White technology. With Tunable White technology, the light can be regulated from incandescent warm to cool white. On request, the ceiling lamp is available DALI, 0-10 Volt dimmable or with Casambi module.
