### Description

The Arturo Alvarez Mytilus MY04-3 consists of three individual MY04G lamps that are suspended together from a canopy. Each lamp shade is made of a painted stainless steel mesh that is finished by hand. In total the lamp has a width of 136 cm and a length of 140 cm. A spherical glass diffuser is integrated in each lamp shade, through which the light is emitted glare-free in all directions. The canopy made of white painted steel has a diameter of 15 cm. The lamp has a maximum overall height of 250 cm. Its transparent cables can be shortened if required. An LED with a colour temperature of 2,700 Kelvin extra warm white is integrated as the light source. The Mytilus MY04-3 with 3,000 Kelvin warm white is available on request.
