Description

The Serien Lighting Curling Suspension Rope Acryl clear / conical opal M is individually settable in height between 15 cm and 195 cm. The clear acrylic lamp shade has a diameter of 22 cm and a height of 9 cm. This lamp emits its light directly downwards and diffuses it softly all around through the reflector.

The pendant lamp Curling Suspension Rope Acryl clear / conical opal M is available with a colour temperature of 2.700 Kelvin extra warm white, 3.000 Kelvin warm white or with Dim to warm function. The lamp with dim to warm function imitates the dimming behaviour of classic incandescent lamps when dimmed, which is often perceived as pleasant. The light not only becomes darker when dimmed down, but even changes its colour temperature. Thus, the colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white when dimmed. The Curling pendant lamp with an acrylic lamp shade is also available with a shade diameter of 16 cm.
