## Description

The Knapstein DINA-S floor lamp can be tilted at will by means of a ball joint on the lamp base. Its head can be rotated and tilted. With a maximum inclination, the floor lamp has a projection of 100 cm. The DINA-S of Knapstein is switched by gesture control and infinitely dimmed. The sensor for gesture control is located on the lamp head. The lamp can be switched on or off with a wiping movement of the hand. The lamp is dimmed by holding the hand in the sensor area for longer periods. A memory function saves the last light intensity setting and automatically sets it again the next time the lamp is switched on. In the event of a power failure, the lamp switches on automatically if it was previously switched on. It remains switched off if it was previously switched off. The surfaces matt nickel, bronze and chrome are available. An LED with a colour temperature of 2,700 Kelvin extra warm white is integrated in the lamp head.
