

LDM

Kyno Spot Uno Surface-mounted Round

Oberfläche

- matt aluminum
- polished aluminum
- black
- bronze
- white

Elemente

- aluminum polished
- black
- gold
- white
- chrome

Dimmbarkeit

- DALI dimmable
- on site dimmable with a trailing edge dimmer
- with Casambi module

Technical details

Country of Manufacture	 Germany
Manufacturer	LDM
protection	IP20
Scope of delivery	LED
voltage suitability	230 - 240 Volt
material	aluminum
beam angle	20 - 60 degrees
Wattage	12 W
LED	inclusive
Colour Rendering Index	97
Luminous flux in lm	1,252
Color temperature in Kelvin	2,700 extra warm white
canopy dimensions	10 cm
light head dimensions	Length 18 cm, 4 cm
bulb exchange	at the manufacturer / at the factory

Description

The LDM Kyno Spot Uno Surface-mounted Round is a surface-mounted ceiling spot made of aluminum. The light is focused by a frosted, optical glass lens. The beam angle of the light can be continuously adjusted between 20 and 60 degrees by turning the glass lens out of or into the lamp head. With a larger beam angle, the light is distributed over a larger area.

The Kyno Spot Uno Surface-mounted Round is available in the surfaces aluminum polished, aluminum matt, bronze, white and black matt. The ring-shaped design element on the lamp head is available in aluminum polished, matt chrome-plated, matt gold-plated, white matt and black matt. The swivel joint has the same surface as the design element, only the lamp with the element in aluminum polished has a chrome-plated swivel joint. The lamp head is a total of 18 cm long without unscrewing the lens and has a diameter of 4 cm.

The Kyno surface-mounted ceiling spotlight is offered with three dimming options: on site dimmable with a trailing edge phase dimmer, DALI dimmable or with an integrated Casambi module. The Kyno Spot Uno Surface-mounted Round is supplied with a colour temperature of 2,700 Kelvin extra warm white. On request, the spotlight is also available with 3,000 Kelvin warm white, 4,000 Kelvin white or with dim-to-warm technology. With the dim-to-warm function, the light colour of the LED changes to a warmer tone when dimmed (from 3,000 Kelvin warm white to 1,800 Kelvin extra warm white). The lamp is operated with Full Spectrum LEDs whose light resembles sunlight.
