Descripción

The Foscarini Aplomb Parete is made of concrete and narrows towards the bottom. Light is emitted through the wide opening at the top and the smaller one at the bottom. The light is radiated through these openings onto the wall so that it is reflected from there, creating a light effect on the wall above and below the lamp.

The wall bracket of the Aplomb Parete is made of lacquered metal. The emitted light is glared by an inner, cone-shaped diffuser made of steel. The lamp is offered in the colours white, brown and grey. The wall lamp has an R7s socket that is operated with an LED retrofit.
