

Marset

Theia P

Oberfläche

- negro
- blanco

Technical details

País de la Fabricación	 España
fabricante	Marset
diseñador	Mathias Hahn
año	2016
protección	IP20
Volumen de suministro	LED
entrada de tensión	230 - 240 Volt
material	aluminio, metacrilato, metal
Color del cable	negro
longitud del cable	200 cm
Atenuación	Toque atenuadores de luz en la cabeza
Potencia en vatios	11,3 W
LED	incluyendo
Indice de reproduccion cromatica	90
El flujo luminoso en lm	1.019
Temperatura de color en grados Kelvin	2.700 extra blanco cálido
Diamètre de l'ombre	32 cm
Dimensiones del soporte de la lámpara	30 cm
Dimensions	H 116 cm

Descripción

The Marset Theia P floor lamp has a rotating lamp shade. This shade consists of two hemispheres, one vertical and one horizontal, which partly overlap each other. The vertically fixed hemisphere is white on the inside, and white or black on the outside. In the corresponding surface are also the light rod and the light base. This hemisphere is made of painted metal. The horizontal hemisphere is made of thermoformed smoked glass methacrylate. The complete shade can be rotated around its own axis via a handle on the light rod. The light is emitted by an LED in a hemispherical element in the centre of the shade onto the white inside of the vertical hemisphere and reflected from there. The lamp shade can be aligned so that the floor lamp can be used as a reading lamp or to create indirect lighting on the wall or an object. The Theia P can be switched and dimmed by pressing a push button dimmer on the lamp head.
