Descripción

The cleverly intertwined shade elements made of Lunopal are reminiscent of airy towering cloud mountains. Lunopal is a high-quality shade material developed by Domus. This material is highly thermally resistant and can withstand temperatures up to 100°C. Lunopal is white transparent and gives the impression of fine Japanese paper. The environmentally friendly material is UV-resistant, washable and does not yellow. A textile-covered cable in either red, black or silver-grey is used as the supply cable. The 200 cm long textile cable of this height-adjustable lamp deliberately contrasts with the white lampshade. The white lamp shade of the Domus Julii pendant lamp is 30 cm high and has a diameter of 36 cm. The Domus Julii pendant lamp has four G9 sockets and is operated with bulbs with a maximum power of 32 watts.
