

Knapstein

ZERA-3 with prism cover

Oberfläche

- níquel
- negro
- bronce

Technical details

País de la Fabricación	 Alemania
fabricante	Knapstein
año	2024
materi al	Acryl, Metall
ajuste de altura	altura ajustable
Atenuación	control por movimientos
Potencia en vatios	6x12 W
LED #	inclusive
Indice de reproduccion cromatica	>90
El flujo luminoso en lm	7644
Temperatura de color en grados Kelvin	2.200-3.000
protección	IP20
Volumen de suministro	LED
entrada de tensión	230 - 240 Volt
dosel	120 x 5,5 x 5,5 cm
Dimension s	L 120 cm

Descripción

The Knapstein ZERA-3 is characterised by its exceptional functionality. The LED pendant lamp emits its light upwards and downwards at the same time. Using gesture control (Knapstein Dynamic White), the uplight and downlight of the three luminaire bodies can be switched and dimmed separately. The light colour can be adjusted separately for the uplight and downlight to a warmer tone (from a colour temperature of 3,000 Kelvin warm white to 2,200 Kelvin extra warm white). All dimming and light colour settings are saved using the memory function and automatically reset the next time the light is switched on. The Knapstein ZERA-3 has a synchronisation function (master/follower light control) for adjusting the light intensity and light colour of all light sources on one side of the luminaire. Once the lamps have been set via the master reflector, the follower reflectors can also be set individually and independently of the master setting using the separate gesture control. The Knapstein ZERA-3 is switched on or off with a swiping hand movement in the sensor area of one of the three luminaire bodies. To change the light intensity, the hand is held longer in the sensor area. The desired light colour can then be set by holding the hand in the sensor area for a longer period again. The three lamp bodies of the lamp have a prismatic cover and produce an almost loss-free and glare-free light emission. With the built-in lift height adjustment, the luminaire height can be continuously adjusted from approx. 70 cm - 170 cm. Thanks to two lifts per luminaire body, the individual luminaire bodies can be precisely positioned in height - even on sloping ceilings. The ceiling canopy of the Knapstein ZERA-3 LED pendant lamp has a magnetic holder, so no external screw connections are visible. This pendant light is available in different surfaces.
