Description

The Marset Santorini Floor has a light rod with a light arm on which the lamp head is suspended. The lamp head consists of a glass diffuser and two lamp shades. The shades are made of polycarbonate and can be attached to each other in different ways. Depending on how the shades are arranged, the light emitted upwards is reflected differently. The lamp shades are available in white, mustard yellow and grey. The rod and base of each version are made of metal. Thanks to the IP65 protection class, the Santorini Floor is also suitable as an outdoor lamp, as it is protected against water jets from any direction and it is dustproof. The lamp can be operated with LED retrofit lamps.
