## Theia P

### Oberfläche

- noir
- blanc

### Technical details

<b>Pays de fabrication</b>	 Espagne
<b>fabricant</b>	Marset
<b>concepteur</b>	Mathias Hahn
<b>année</b>	2016
<b>protection</b>	IP20
<b>Contenu de la livraison</b>	LED
<b>aptitude de tension</b>	230 - 240 Volt
<b>matériel</b>	aluminium, métal, méthacrylate
<b>couleur de câble</b>	noir
<b>longueur de câble</b>	200 cm
<b>atténuation</b>	Touchez gradateurs sur la tete de lumière
<b>Puissance en Watt</b>	11,3 W
<b>LED</b>	y compris
<b>Indice de rendu des couleurs</b>	90
<b>Flux lumineux en lm</b>	1.019
<b>La température de couleur en Kelvin</b>	2.700 extra blanc chaud
<b>Diamètre de l'ombre</b>	32 cm
<b>Pied de lampe dimensions</b>	30 cm
<b>Dimensions</b>	H 116 cm

### Description

The Marset Theia P floor lamp has a rotating lamp shade. This shade consists of two hemispheres, one vertical and one horizontal, which partly overlap each other. The vertically fixed hemisphere is white on the inside, and white or black on the outside. In the corresponding surface are also the light rod and the light base. This hemisphere is made of painted metal. The horizontal hemisphere is made of thermoformed smoked glass methacrylate. The complete shade can be rotated around its own axis via a handle on the light rod. The light is emitted by an LED in a hemispherical element in the centre of the shade onto the white inside of the vertical hemisphere and reflected from there. The lamp shade can be aligned so that the floor lamp can be used as a reading lamp or to create indirect lighting on the wall or an object. The Theia P can be switched and dimmed by pressing a push button dimmer on the lamp head.
