Description

The Byok Grado T 4 floor lamp emits light simultaneously upwards and downwards. This two-armed lamp can be attached directly to the furniture or positioned movably with one base. This lamp is available in three versions: DALI dimmable or with an integrated daylight and motion sensor with and without an additional sensor for uplight.

The Grado T 4 is particularly suitable for lighting up to four workstations. In the two versions with daylight and motion sensors, each workstation is assigned to an individual sensor so that each workstation can be illuminated differently. The floor lamp is available in matt anodised aluminum, matt white and matt black. As standard it is supplied with a colour temperature of 3,000 Kelvin warm white, on request it is also offered with 4,000 Kelvin white.
