### Description

The Knapstein PIA-4 is a square ceiling lamp. It has a length and width of 41 cm each. Its total height is 5.2 cm. Its flat design is made possible by a magnetic holder, which ensures also that no visible screws in the ceiling housing are existing. The light is diffused and homogeneously distributed downwards through a matted glass. The ceiling housing has a matt nickel-plated surface. Four integrated LEDs, each with a colour temperature of 2,700 Kelvin extra warm white, are included as light sources. The PIA-4 from Knapstein can be dimmed on site with a phase dimmer. The smaller, square PIA-1 and other rectangular or round ceiling lights are also available from the series.
