Description

The Bomma Disc Pendant Metal is a pendant lamp with a mouth-blown glass that is half covered with metal in silver. The lower, clear part of the glass emits the light homogeneously downwards and into the room. The upper part of the glass with metal coating provides numerous light reflections on the lamp. Each glass is individually coated with metal during production, so that the intensity and colour of the metal coating can vary.

The Disc Pendant Metal has a cable with a maximum length of 250 cm which can be individually set during assembly. The E27 socket of the lamp is operated with a replaceable LED retrofit bulb.
