Description

Inspired by classic Maria Theresa chandeliers, the Bover Bol lamp was created as a large, contemporary chandelier whose charm lies in its opaque body and the upper and lower light path emitted from its shades. Other applications such as floor lamps, wall lamps or table lamps are also available. Light, floating structures with a discreet, stylish lighting effect in the dark. The central structure of the Bover Bol lamps consists of various stems and shades that can be connected to each other via a central rod. This makes it possible to create different figures, both horizontally and vertically, even continuous sequences.
