## Description

The Knapstein ASTRA-60 has a curved metal cover with freely combinable outer structures. This metal cover is placed on a magnet attached to the mounting plate. By turning the cover on the magnet, the distance between the cover and the wall or ceiling can be changed by up to approx. 35 mm at any time, making it easy to customise the light outlet. The LED lamp offers an almost loss-free and glare-free light emission and allows flexible brightness control. The Knapstein ASTRA-60 emits indirect light, has a diameter of 60 cm and is 8.5 cm deep. This lamp can be mounted on the wall or ceiling. It is also possible to connect several ASTRA lamps together if an overlap is desired. The Knapstein ASTRA-60 is available in several surfaces and freely combinable external structures.
