Omschrijving

This Licht im Raum Ocular Spot spotlight has a round junction box, which is let into ceiling or wall. It belongs to the more light-intensified series 100, which have 100 mm diameter lenses. The rotating and tilting joint allows a flexible alignment of the light. In addition, the lens is traversable and can be zoomed in or out. Thus, the radiation angle can be varied between 50 and 70 degrees.

The lamp body made of stainless steel is available in polished or matt nickel-plated. On-site dimming is possible. On request, the connection socket is also offered in square form.
