### Omschrijving

The Catellani & Smith Ciclotalia T is the natural evolution of the historic Ciclocina lamp from 1989. It is made entirely of handcrafted brass that remains untreated. As a result, the surface tarnishes and changes over time. A frosted glass lens bundled the light from the integrated LED. On the cable is an integrated touch dimmer. A memory function saves the last brightness level set and automatically selects it the next time the power is turned on. The Ciclotalia T table lamp has joints on the lamp head and lamp base so that both the lamp rod and the lamp head can be individually adjusted.
