### Omschrijving

The multiple pendant lamp Bover Domita S/20/13L consists of thirteen individual pendants, which are suspended from the canopy in different lengths. The shades of the Bover Domita S/20/13L pendant are made of completely natural beech wood. The cables run laterally out of the round brown canopy and are fixed to the desired position with ceiling fixings. The position of the individual pendant lights can thus be determined by yourself. Each of the thirteen lampshades has a diameter of 20 cm and is 25.5 cm high. The light of the Bover Domita S/20/13L is emitted directly downwards, but also diffusely through the braiding of the lampshade and at the same time distributed to the sides. The light sources in the GU10 sockets inside the lamps are interchangeable. The total height of this pendant lamp with black cables is 272 cm.
