### Omschrijving

The Domus Fläks Table Lamp is 55 cm high and 15 cm wide. Its depth is 20 cm. Thanks to an integrated magnet, the lamp can be positioned freely on the lamp base. The lamp base is made of white, powder-coated metal. Its lamp shade is made of Lunopal, a high-quality material that Domus has developed for its lamp shades. This material is thermally highly resilient and can withstand temperatures of up to 100°C. Lunopal is white transparent and gives the impression of fine Japanese paper. The completely environmentally friendly material is UV-resistant, washable and does not fade. There is a hand dimmer on the supply cable. The Fläks Table Lamp has an E27 socket that can be operated with replaceable LEDs (retrofit).
