

Knapstein

ZERA-3 with acrylic cover

Oberfläche

- nikkel
- zwart
- bronzen

Technical details

Land van fabricage	 Duitsland
fabrikant	Knapstein
jaar	2024
materiaal	Acryl, Metaal
hoogteverstelling	hoogte verstelbaar
dimmen	gebarencontrole
Wattage	6x12 W
LED #	inclusief
Kleurweergave-index	>90
Lichtstroom in lm	7644
Kleurtemperatuur in Kelvin	2.200-3.000
bescherming	IP20
Omvang van de levering	LED
voltage geschiktheid	230 - 240 Volt
baldakijn	120 x 5,5 x 5,5 cm
Dimensions	L 120 cm

Omschrijving

The Knapstein ZERA-3 is characterised by its exceptional functionality. The LED pendant lamp emits its light upwards and downwards at the same time. Using gesture control (Knapstein Dynamic White), the uplight and downlight of the three lamp bodies can be switched and dimmed separately. The light colour can be adjusted separately for the uplight and downlight to a warmer tone (from a colour temperature of 3,000 Kelvin warm white to 2,200 Kelvin extra warm white). All dimming and light colour settings are saved using the memory function and automatically reset the next time the light is switched on. The Knapstein ZERA-3 has a synchronisation function (master/follower light control) for adjusting the light intensity and light colour of all light sources on one side of the lamp. Once the lamps have been set via the master reflector, the follower reflectors can also be set individually and independently of the master setting using the separate gesture control. The Knapstein ZERA-3 is switched on or off with a swiping hand movement in the sensor area of one of the three lamp bodies. To change the light intensity, the hand is held longer in the sensor area. The desired light colour can then be set by holding the hand in the sensor area for a longer period again. The three lamp bodies of the light have a white acrylic cover with a visible edge at the side. The height of the light can be continuously adjusted from approx. 70 cm to 170 cm using the built-in lift height adjustment. Thanks to two lifts per lamp body, the individual lamp bodies can be precisely positioned in height - even on sloping ceilings. The ceiling canopy of the Knapstein ZERA-3 LED pendant lamp has a magnetic holder, so no external screw connections are visible. This pendant lamp is available in different surfaces.
