Opis

The Dew Drops Table is an innovative table lamp from of the year 2013, which was first shipped in October, 2014. The central element is a transparent plastic film, in which the 750 LEDs are integrated. The film is held by two tiltable metal rods and can be repositioned repeatedly. The Dew Drops Table is suitable for 100-240 volts, 50 / 60Hz, (wide range input), secondary 48 volts.

A transformer is integrated in the plug. Switched and continuously dimmed is the Dew Drops Table by a sensor on the plastic slide. In the undimmed state the luminous flux is more than three times as much as with a conventional 60-watt bulb. The color reproduction is very good. The Dew Drops Table was nominated for the German Design Award in 2015.
