Opis

The Mawa One Piece 7 wall lamp emits its light to the ceiling and the wall behind it. The homogeneous ceiling illumination also reaches deep into the room. The cover made of borosilicate glass on top of the lamp guarantees a soft light gradient. The ceiling floodlight is made from a single piece of aluminum using a folding technique. It is available in the powder-coated surfaces white matt, dark bronze and DB702 metallic grey. The One Piece 7 wall lamp is operated with an integrated LED, which has a colour temperature of 2700 Kelvin extra warm white. On request, the lamp is also available with a colour temperature of 3,000 Kelvin warm white or 4,000 Kelvin white. The wall light can be dimmed on site with a leading edge or trailing edge phase dimmer. On request, it is also available as a DALI or 1-10 Volt dimmable version. The One Piece 7 ceiling floodlight is 16.5 cm deep and 27 cm wide.
