### Opis

The Bomma Disc Pendant has a mouth-blown, clear glass with a diameter of 50 cm. Including its suspension, it has a height of 44.5 cm. Each glass is made of crystal glass and is mouth-blown in individual production, therefore small bubbles or irregularities in the glass can occur. The Disc pendant lamp is offered with a metal suspension in silver nickel or black powder-coated. The canopy and the lamp socket are delivered in the matching colour of the suspension. The cable has a maximum length of 250 cm and can be shortened if necessary. Special lengths for the cable are also available on request. The lamp is operated with a replaceable E27 LED retrofit.

The light is emitted homogeneously in all directions with this pendant lamp with clear glass, whereby light reflections are partially created on the glass. Bomma also offers the Disc Pendant Metal from the series with a glass that is half covered with metal.
