### Opis

The cleverly intertwined shade elements made of Lunopal are reminiscent of airy towering cloud mountains. Lunopal is a high-quality shade material developed by Domus. This material is highly thermally resistant and can withstand temperatures up to 100°C. Lunopal is white transparent and gives the impression of fine Japanese paper. The environmentally friendly material is UV-resistant, washable and does not yellow. A textile-covered cable in either red, black or silver-grey is used as the supply cable. The 200 cm long textile cable of this height-adjustable pendant lamp deliberately contrasts with the white lampshade. The white lamp shade of the Domus Julii pendant lamp is 45 cm high and has a diameter of 54 cm. The Julii 54 pendant lamp has a total of four E27 sockets and can be operated with conventional halogen bulbs as well as with LED retrofit bulbs.
