Opis

The Domus Kioto 16 can also be mounted as a wall lamp. It is suitable as a surface-mounted or recessed lamp. The Kioto 16 has a length and width of 68 cm. It is 8 cm high. The material Lunopal of the lamp shade was especially developed by Domus for its lamp shades. It is particularly environmentally friendly, does not fade and is reminiscent of fine Japanese paper. Around the lamp shade is a wooden frame made of beech. The ceiling and wall lamp is operated with a powerful, dimmable LED. A covering frame made of beech is available as an accessory, which can be used to conceal the metal holder of the lamp.
