

Knapstein HELLI-2

Oberfläche

- nikiel
- czarny
- brąz

Struktur

- Nikiel
- czarny
- bronze

Technical details

Kraj produkcji	Niemcy
roducent	Knapstein
rok	2023
tworzywo	Acryl, Metall
regulacja wysokości	z regulacją wysokości
ściemnianie	kontrola gestów
Moc w watach	4x8 W
LED #	włącznicie
Wskaźnik oddawania barw	>90
Strumień świetlny w lm	4280
Temperatura barwowa w stopniach	2.700 bardzo ciepła biel
Kelvina	
ochrona	IP20
zakres dostawy	LED
napięcie przydatność	230 - 240 Volt
baldachim	70x4,5 cm
wymiana żarówek:	u producenta / w fabryce
wysokość całkowita	70 - 170 cm

Opis

The Knapstein HELLI-2 LED pendant lamp has two cylindrical lamp bodies with freely combinable structures on the underside. The lenses of the lower diffusers are reversible, making it easy to choose between a lens for a focussed lighting effect and a disc for a diffuse lighting effect. To do this, unscrew the lower luminaire ring and replace the enclosed glass in the desired position (lens/disc). The aforementioned screw ring (structure) is available in 3 different colours. A swiping hand movement in the sensor area switches the corresponding light source on or off. To dim the light, the hand is held in front of the respective sensor until the desired light intensity is reached. Thanks to the integrated memory function, the last settings are saved and are immediately available again the next time the light is switched on. The uplight and downlight can be switched and dimmed separately using gesture control. Thanks to individual lift suspensions, the lamp bodies can be infinitely adjusted in height from approx. 70 cm - 170 cm at any time by simply pulling or lifting - even on sloping ceilings. The Knapstein HELLI-2 has a synchronisation function for adjusting the light intensity of all light sources on one side of the luminaire. The rectangular ceiling canopy of the Knapstein HELLI-2 LED pendant lamp has a magnetic holder, so no external screw connections are visible. This pendant lamp is available in several surfaces and freely combinable external structures on the underside.
